

Dr. Stern's — Dental Implant Center

Dental treatment that once took several months is today performed in minutes. Implant surgery once requiring hours under general anesthesia is now performed in less than an hour, without surgery. At Dr. Stern's center, only the imagination and *siyata D'shmaya* limit what can be done.

Center's Director

Dr. Gedaliah Mordechai Stern, born in the US, came to Israel about thirty years ago. Dr. Stern learned in the renowned yeshivos of America and Eretz Yisrael and is a graduate of the prestigious universities of New York, Pittsburgh, and Boston. A resident of Yerushalayim, married, with "Yerushalmi" children and grandchildren, baruch Hashem.

The Story

I always wanted to be a magician, but my mother, *sheticyeh* said I needed to learn a profession. I respected her wish but did not give up on my dream and so combined my professional academic achievements with the ability to perform "miracles" for people and to help in areas not previously possible. I was born to a family wiped out by the Holocaust — grandparents,

uncles, aunts who ascended to Heaven by way of the chimneys of Auschwitz. I was raised in New York and moved to Eretz Yisrael after years of learning and studying. My response would be to build a medical center, the most advanced in the world, in Yerushalayim — an "operation" that would be a "*kiddush Hashem*." In the early 1980s, I consulted with *gedolei hador* whether the field of implant dentistry was feasible in Eretz Yisrael. The response I received was: "In ten years you'll need a building just for implants!" The blessing and advice materialized — above and beyond.

A Pleasure to meet

The Implant Center is located in Rechavia (Jerusalem)* providing a blend of the most advanced technology and experience in the world along with a personal touch, and

caring, sensitive attention to the needs of each individual. After thirty years experience in the field, and having restored tens of thousands of teeth with implants, I have come to the conclusion that we must focus on the person, not the teeth, to address first and foremost the person's needs for comfort, function, health, and esthetics. Accordingly, we developed advanced techniques, integrating lasers, ultrasonics, digital tomography, and other advanced technologies.

A Reason to be Proud

Our center is comprised of doctors who are true *beni Torah* and *yirei Shamayim* as well as on the highest professional level, alongside a team of women whose husbands and families are devoted to Torah, without whom we could never have accomplished such a dream. We value our healthy traditional atmosphere and the tremendous *zechus* to treat the great Roshei Yeshivos and Rebbes, and their families, along with good, fine people of every kind and sort. Baruch Hashem our clientele come from around the world, entrusting us with their loyalty and faith.

The Center's "Crown Jewel"

Our center is unique in its blend of years of advanced education, experience, and enormous *siyata d'Shmaya*. Our ability to help others is significant and not infrequently "lifesaving" — certainly life changing!

The Future is Bright

What we accomplished twenty-five years ago in ten

Excellence and Success

— 2009 —

Name: Dr. Gedaliah Mordechai Stern

Position: Director

hours under general anesthesia and many surgeries, we do today in less than an hour without surgery. Reconstructions that once required seventeen months, four times a week, four hours each visit, today can take seventeen *minutes*. We continue to forge forward to provide a quality of life that once could only be dreamed of: to feel good, to look good, and to be done with necessary care — faster, easier, and better than ever before.

A Final Comment

We cannot thank enough the thousands of people from Israel and around the world for the tremendous strength that they have given us through their continuous support, encouragement and blessings.

*Over the past years Dr. Stern and his implant team have been in N.Y. as well, several times a year. Dr. Stern has been coming to the U.S. regularly.
